Introduction to Computer Science: Practice 1

[Basic Training]

1. Please try to compile and execute FirstProgram.java.

2. Please modify FirstProgram.java. Change “System.out.println” to “System.out.print”. Compile and execute the code again, and compare the output with the original code.

3. Please modify FirstProgram.java to enable the program to output the result of
   a. answer = 2 * 2
   b. answer = 2 / 2
   c. answer = 2 * 2 + 2 / 2
